

# Employer & Community Organization COVID-19 Vaccine Clinic Registration

Help drive vaccine engagement with employees and members using our custom text link registration and simple scheduling process. As a CDC partner, the Meijer Pharmacy will be administering COVID-19 vaccines when they become available to us. Our pharmacists have been helping to protect our communities from vaccine-preventable disease for over 15 years.

## Helping communities achieve COVID-19 vaccination through:

- Easy Registration
- Custom Scheduling
- Safety Procedures
- Experience & Outreach
- Dedicated Teams
- Drive-Thru Clinic Experience
- Partnerships with Community and Athletic Organizations

## Employer & Community Organization Clinic Registration:

Custom text link registration for employers and large groups

**Example:** Sommerfield Public Schools clinic participants can text “**SPS**” to **75049** to register.

## Registration & Scheduling Made Simple:

- Flexible scheduling via text messaging, three days prior to clinic (other options available for non-texting employees and members).
- Employees and members will have three options:
  - **Opt-in** for the clinic at specific date and time
  - **Defer** until a later date and stay on the waitlist
  - **Opt-out** of future communication and clinics
- Clinic opt-in will auto-schedule for second vaccine dose and send a message.
- Employees and members will receive a reminder text one day prior to their scheduled clinic.
- The clinic will be a contactless process and will utilize an electronic line system to help with capacity and ensure proper social distancing.
- The COVID-19 vaccine is in limited supply now, but we expect it to be more widely available across our communities in the coming months.
